## CAPITAL INVESTED: BY INDUSTRIES.

[Credit Capital (supplied by partners or stockholders) includes all amounts supplied by partners or stockholders, these sums being practically loaned by them to the firm or corporation. Credit Capital (bills payable, accounts on long time, etc.) includes all money that the firms or corporations have had the use of through the giving of notes or the obtaining of credit for a long time either for goods or money. The Total Capital invested includes the whole amount of money invested in plant, goods, and accounts, and the cash and borrowed money which were needed and used in the production of goods.]

## STOCK USED: BY INDUSTRIES.

[In the instructions in the schedule upon which were made the returns that supply the information contained in this presentation, the manufacturers were called upon to give the most complete detail regarding articles used as stock, and were requested not to use such unmeaning designations as "sundries," "miscellaneous," "other articles," etc. The only condensation made in the original returns has been to combine, so far as practicable, those general lines which mentioned two or more articles of stock without specification of the quantity and value for each article used. The order is alphabetical with subsidiary classifications under such general titles as "Coal," "Iron," "Lumber," etc. The quantities and values given are State totals of the various kinds of stock used in each industry. The italic letters, *n. s.*, denote the abbreviation of the words, "not specified." Reference should be made to the "ANALYSIS" for a description of the method of classification under industry heads.]

### AGRICULTURAL IMPLEMENTS.

| ARTICLES, ETC.                              | Basis        | Quantity                          | Value  |
|---------------------------------------------|--------------|-----------------------------------|--------|
| Acid, muriatic . . . . .                    | gallons      | 11                                | \$2    |
